Education

Delhi Technological University

Bachelor of Engineering in Electronics and Communication

Aug 2024 – Aug 2028

CGPA: 8.72 / 10

Experience

Hogwarts Studio

Jun 2026 – Present

Software Engineering Intern (Remote)

- Architected and implemented an internal CRM platform using **Next.js**, **TypeScript**, and **n8n**, streamlining the complete client lifecycle from lead capture to project delivery through **15+ automated workflows**, improving operational efficiency by **60%**.
- Developed event-driven webhook integrations for sales and finance workflows, automating proposal generation, payment processing, notifications, and project tracking, reducing manual effort by **70%** and ensuring consistent data synchronization across systems.

Projects

DevDual: Real-Time Coding Battle Platform

[LINK](#)

Technologies: *React.js, Node.js, Express.js, MongoDB, Socket.IO, Docker, Firebase*

- Developed a real-time **1v1** coding battle platform with synchronized match timers, live code execution, in-room chat, and Elo-based rating updates using Socket.IO and MongoDB.
- Engineered a secure Docker-based code execution engine to run untrusted C++ submissions inside isolated containers with resource limits, timeout handling, and automated test-case validation.
- Implemented JWT and Firebase authentication, private messaging, notifications, match history, and global leaderboards to deliver a complete competitive programming experience.

Shawty: URL Shortener & Analytics Platform

[LINK](#)

Technologies: *React.js, Node.js, Express.js, MongoDB, Redis, Cloudinary, JWT*

- Built and deployed a full-stack URL shortening platform with JWT authentication, custom short links, user profile management, and detailed click analytics.
- Integrated Redis caching for low-latency URL redirection, Cloudinary for media storage, and analytics dashboards for tracking link performance and traffic sources.

Vincentra: AI Powered LMS Web Application

[LINK](#)

Technologies: *React.js, Redux Toolkit, Express.js, MongoDB, Firebase, Razorpay, Google Gemini API*

- Engineered a full-stack e-learning marketplace with separate student and educator portals, designing RESTful APIs for course management, authentication, enrollment, and content delivery.
- Integrated Razorpay payments, Google Gemini API for AI-powered course recommendation, Firebase authentication, OTP-based password recovery, analytics dashboards, and Cloudinary media storage.

Skills

Core Subjects: Data Structures & Algorithms, OOP, DBMS, Computer Networks

Programming Languages: C, C++, JavaScript, TypeScript

Frontend: React.js, Next.js, Redux Toolkit, HTML, CSS, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Tools : Git, Redis, GitHub, Docker, n8n, Postman, Vercel, Render

Certifications & Achievements

- **LeetCode Knight (Max Rating: 1963):** Ranked in the top **3.05%** globally in rated contests with **1200+** DSA problems solved across multiple platforms.
- **Full Stack Web Development Bootcamp (5 Months) :** Completed an intensive MERN stack program focused on building production-ready full-stack applications..
- **LeetCode Contest Achievements:** Rank **598** among 35k+ (Biweekly Contest 174) and Rank **902** among 32k+ (Weekly Contest 480).
- **Academic Scholarships:** Awarded Golden Pride Scholarship and National Scholarship for academic performance.
